Dragonfly: Creating Care Communities

Overview & Demo

Agenda

- Intro to Dragonfly

- Dragonfly Demo

- Q&A

Dragonfly Audience

In the Process of Implementing:

- Meaningful Use
    - Clinical Decision support via Provider Alerts MU Stage 3 Req:
        - Behavior Data Capture, Care Coordination, Patient/Family Engagement
- Value-Based Care Models
    - PCMH / P4P
    - Bundled Payments
    - Shared Risk

The Problem

- Lack of Visibility into Patient Warning Signs

- Current Patient Self-Tracking Statistics
  - 45% of U.S. Adults Diagnosed with a Chronic Condition
  - 70% Track Some Data

- The Gap

- Remote Patient Monitoring
  - Net savings of $1,100 / patient / year
  - Better patient experience, staff satisfaction

The Solution – Dragonfly

- Patients Track and Share Data

- Real Time Alerts

  - To the Patient's Phone

  - To the Care Team in the EHR

- Deliver Patient Education

- Connect Patients and Families with Physicians

- Focus Clinical Resources

Currently Targeted Chronic Conditions

- Congestive Heart Failure

- Chronic Obstructive Pulmonary Disease

- Diabetes Type 1 & Type 2

- Hypertension

- Obesity

- Asthma
